Established in 2001 to meet the growing demand of education, National University System is a network of nonprofit institutions dedicated to offering innovative and relevant educational programs to a diverse population of students, serving the needs of working adults. NUS includes four institutes of higher learning:

- National University
- John F. Kennedy University
- City University of Seattle
- Northcentral University

National University System offers degree programs related to health care data, systems, and informatics at each of our affiliates. Our programs prepare graduates to seek employment in a wide range of settings, including health care, technology, government, and consulting organizations. Graduates will be prepared to continue their education and advance their professional careers in data analytics, project management, health information systems, technology and innovation, and information/cyber security.

LEAD THE WAY WITH DATA AND TECHNOLOGY FOR HEALTHCARE

KEY PROGRAM HIGHLIGHTS:

- Identify innovative and efficient solutions to solve organizational problems
- Learn to use data to transform business decision making
- Demonstrate critical and analytical skills to synthesize concepts and skills to solve organizational problems while adhering to ethical standards
- Examine the current state and future advances in the field
- Develop team skills to ethically research, develop, and evaluate solutions to improve performance
- Integrate data and analytics to produce meaningful intelligence
- Integrate legal, ethical, and global implications of information systems

See reverse for specific program information.
